ANUJ BISHT

AI Engineer

anujbisht09@gmail.com | +91 - 9013759520 | Delhi, India | linkedin.com/in/anujbisht

PROFESSIONAL SUMMARY

AI Engineer with 2+ years of experience building production-grade LLM applications, Retrieval-Augmented Generation (RAG) pipelines, and AI-driven evaluation systems for enterprise clients. Experienced in integrating large language models with Azure cloud services, speech-to-text, and conversational AI avatars to automate complex workflows such as interview assessment and resume screening. Strong foundation in Python, prompt engineering, semantic matching, and structured data pipelines, with a focus on scalable, reliable, and explainable AI solutions.

TECHNICAL SKILLS

AI / ML: Generative AI, Retrieval-Augmented Generation (RAG), Prompt Engineering, Natural Language Processing (NLP), LLM Evaluation, Model Context Protocol (MCP)

Languages: Python, SQL

Frameworks & Tools: Streamlit, Gradio, HuggingFace, Ollama, ElevenLabs, HeyGen, REST APIs, Docker, Git, CrewAI, Promptfoo

Cloud & Data: AWS, Azure, SQLite, MongoDB, FAISS, OpenSearch

PROFESSIONAL EXPERIENCE

Associate Software Engineer (AI) – TestingXperts December 2024 – Present

- Design and deliver LLM- and RAG-based solutions for enterprise clients, from architecture through deployment.
- Build end-to-end AI pipelines combining LLMs, speech-to-text, and cloud storage to automate candidate assessment.
- Develop prompt strategies and structured evaluation frameworks that produce consistent, standardized, and explainable AI outputs.

Software Developer Trainee (AI) – TestingXperts June 2024 – November 2024

- Developed AI/ML components and LLM-powered prototypes in Python for client-facing AI initiatives.

PROJECTS

AI-Powered Interview Evaluation & RAG System

- Engineered an end-to-end **RAG-based interview evaluation system** integrating HeyGen AI Avatar, LLMs, Azure Speech-to-Text, and Azure Blob Storage.
- Designed an interactive interview workflow in which the avatar responds dynamically using **LLM-generated system prompts** grounded in user-provided information.
- Automated transcription of interview sessions with **Azure STT**, storing structured JSON transcripts in Azure Blob Storage for downstream processing.
- Built a RAG/LLM pipeline to ingest and analyze transcripts, generating contextual insights and structured evaluation results.
- Implemented **ORBIT-based scoring** to produce standardized interview scores, enabling automated and scalable candidate assessment.

AI-Powered Resume Screening System

- Built a semantic resume screening pipeline using **iapp/OpenThai-SystemOne** to evaluate candidate profiles against job-specific requirements.
- Engineered a **JD-to-evaluation framework** that converts job descriptions into structured questions covering skills, experience, and qualifications.
- Designed a **SQLite-backed evaluation layer** to persist job descriptions, generated questions, resumes, and screening results.
- Implemented semantic resume-to-JD matching and scoring, and a candidate fit classification workflow that turns unstructured resumes into actionable screening scores.

AI Quiz Application

- Developed a **Gradio-based quiz interface** powered by an LLM that generates multiple-choice, true/false, and subjective questions aligned to AINS guidelines, with automated response collection and result generation.

EDUCATION

Bachelor of Technology, Computer Science and Engineering 2020 – 2024

Dr. A.P.J. Abdul Kalam Technical University | First Class with Distinction (80.90%)

CERTIFICATIONS

AWS Certified AI Practitioner – Amazon Web Services
